## AVVERTENZE

I dati riferiti agli anni dal 1952 al 1971 sono stati ricostruiti sulla base dei risultati dei censimenti demografici del 1961 e 1971, mentre quelli relativi agli anni dal 1972 al 1978 sono stati ottenuti a calcolo tenendo presenti le risultanze anagrafiche concernenti il movimento naturale e migratorio della popolazione residente.

Detta ricostruzione è stata attuata distintamente per sesso ai confini provinciali dell'epoca attraverso due successive fasi: a) è stata ricalcolata la serie storica della popolazione residente per il complesso del territorio, utilizzando per il periodo 1962-1971 una metodologia (1) che può essere così sintetizzata: le emigrazioni sono state determinate redistribuendo nei singoli anni del decennio intercensuale il contingente globale delle cancellazioni per

---

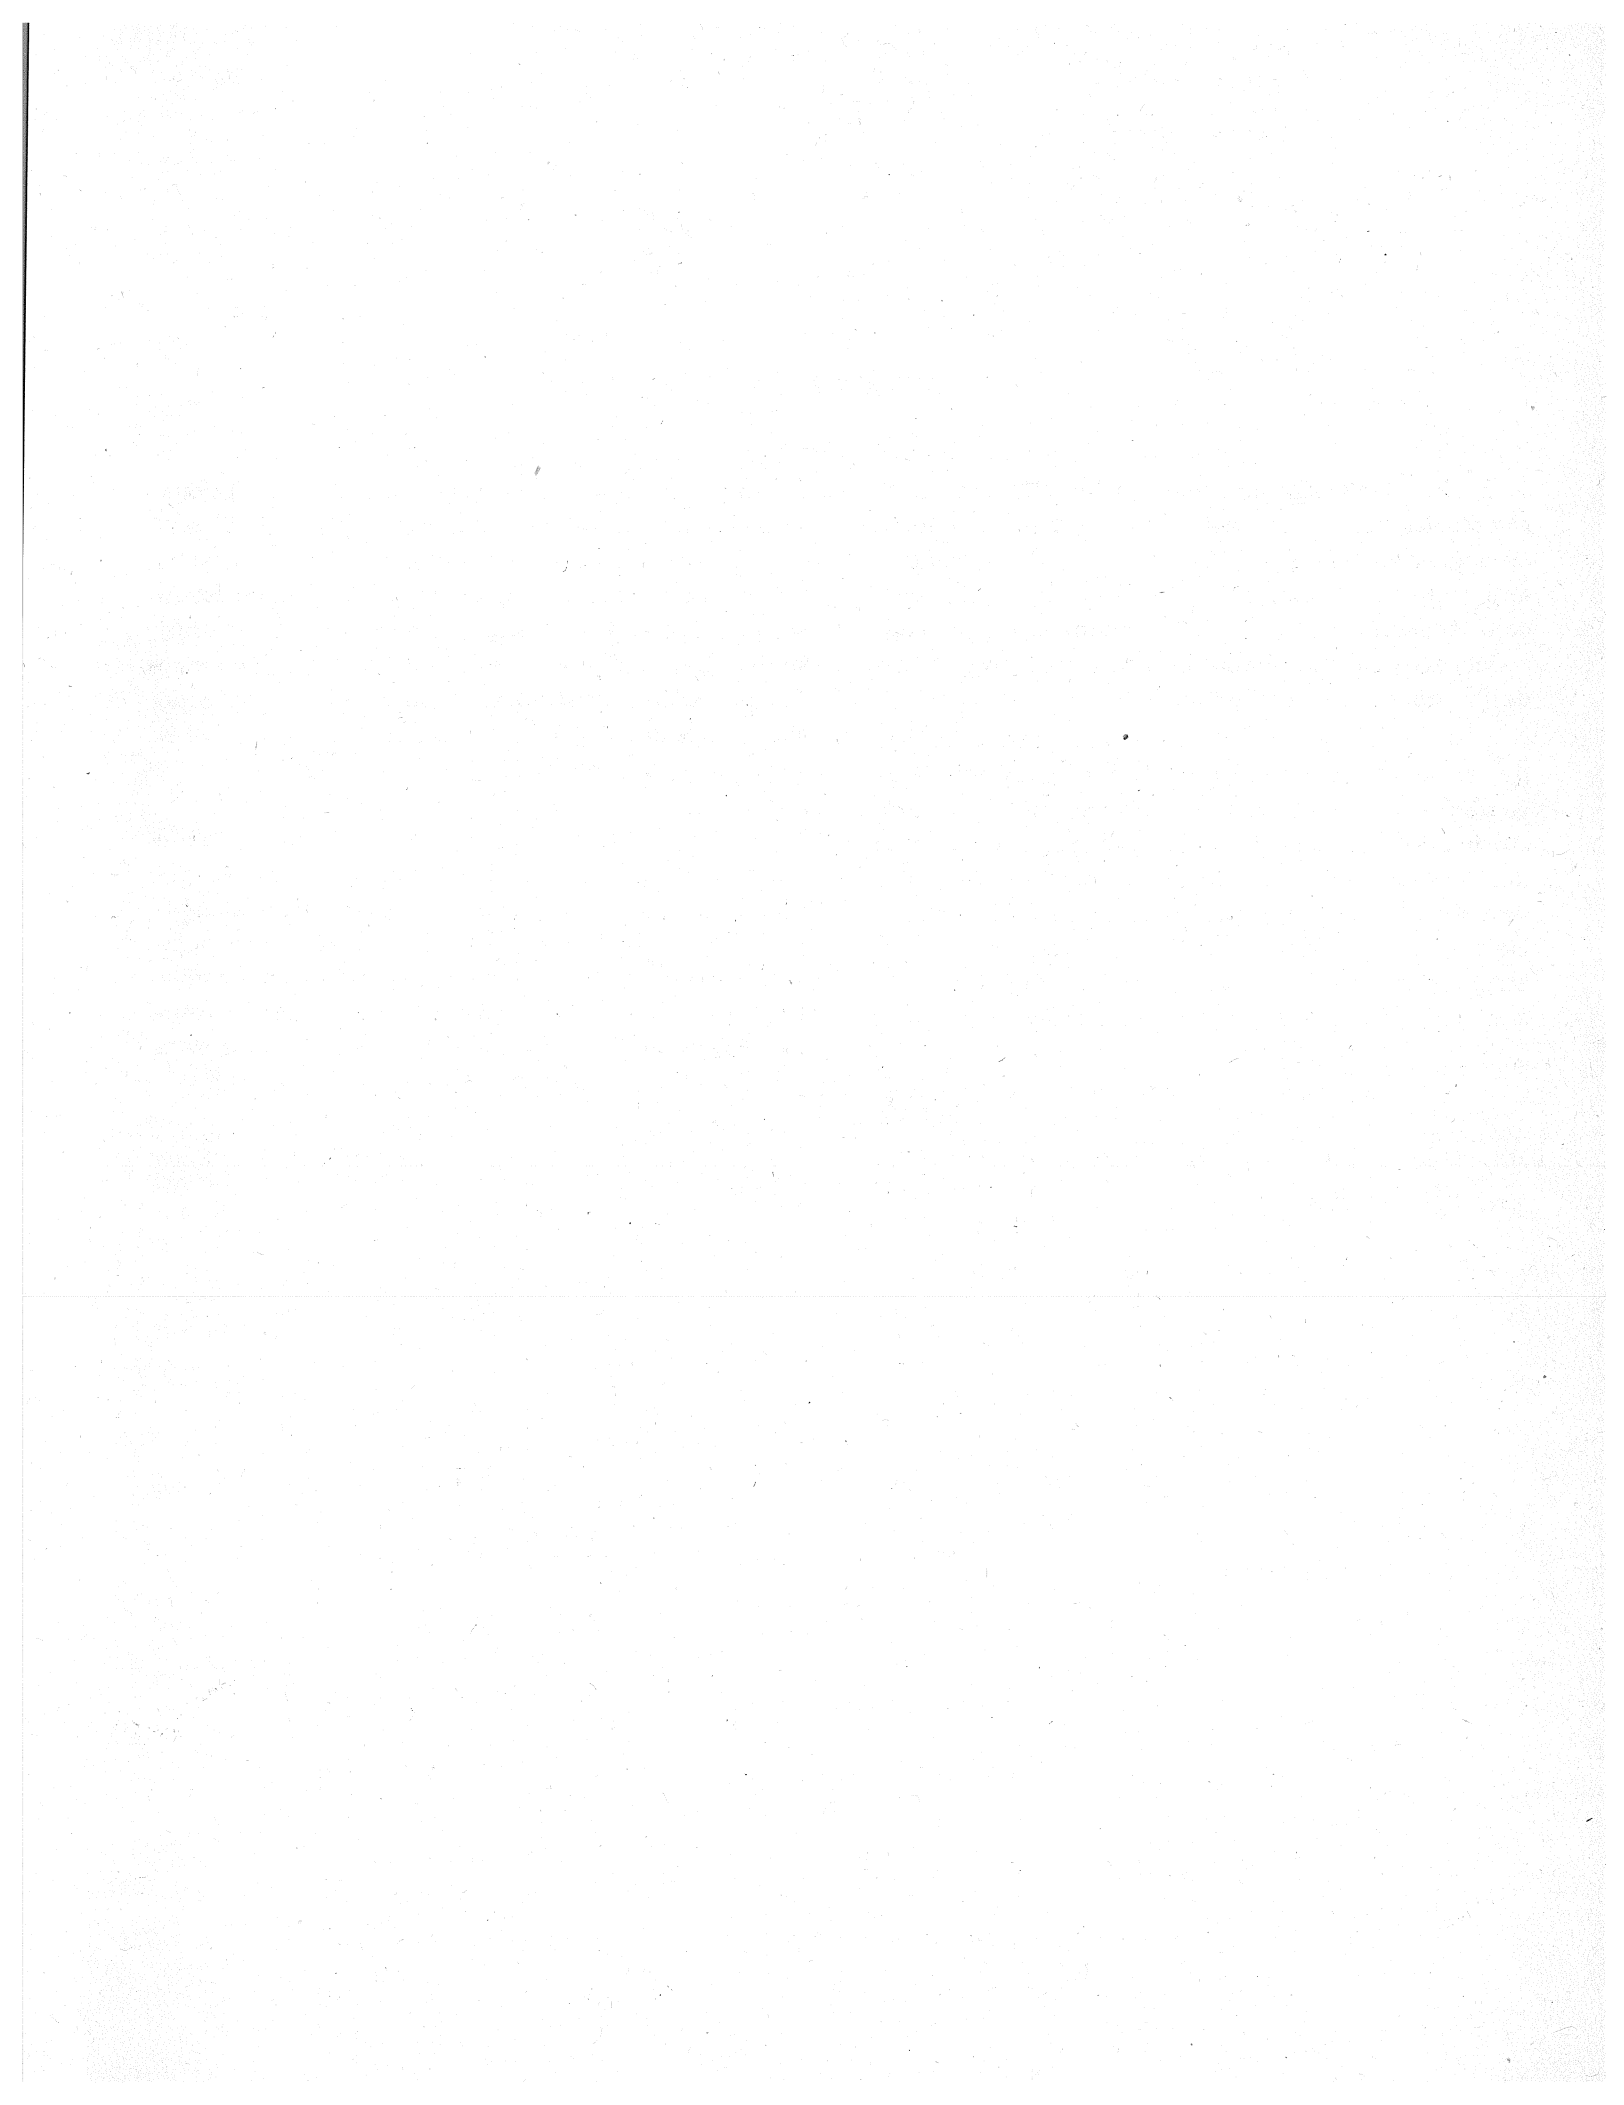

(1) Tale metodologia è molto simile a quella utilizzata per il calcolo retrospettivo relativo al decennio 1952-1961, riportata con notevole dettaglio di analisi nello studio: F. GIUSTI, *Bilanci demografici della popolazione italiana dal 1861 al 1961*, Annali di Statistica, serie VIII, vol. 17, Roma 1965.

l'estero aumentato della differenza tra popolazione calcolata mediante i dati anagrafici alla data di censimento e la corrispondente popolazione censita; tale redistribuzione è stata effettuata tenendo conto delle serie — opportunamente perequate — dei dati sugli espatri, al netto dei rimpatri avvenuti entro l'anno stesso di rilevazione. Le immigrazioni sono state ottenute procedendo a perequazione grafica della successione dei dati annuali riguardanti le iscrizioni dall'estero.

b) La consistenza demografica delle provincie è stata ricostruita per tutto il periodo 1952-1971 tenendo conto delle differenze — ripartite linearmente in ciascuno dei due decenni — tra le percentuali di popolazione censita in ciascuna provincia rispetto al totale nazionale e le analoghe percentuali relative alla popolazione calcolata alla data di censimento attraverso i dati anagrafici (2).

---

(2) Descrizione dettagliata del procedimento metodologico impiegato è contenuto in: M. NATALE, *Stima retrospettiva della popolazione residente provinciale nel periodo 1951-1961*, op. cit.
