AVVERTENZE

I dati esposti nel presente volume riguardano le « ditte » e le « unità locali », risultanti dal III Censimento generale dell'industria e del commercio (5 novembre 1951).

Il volume consta di due parti: la prima parte fa riferimento alle ditte, la seconda alle unità locali.

I caratteri considerati sia nella prima parte che nella seconda sono in linea di massima gli stessi esaminati negli altri volumi del Censimento, ma in forma più sintetica. Pertanto, per una maggiore analisi dei dati esposti, si rimanda ai citati volumi.

Per la corretta interpretazione dei dati si espongono, qui di seguito, i criteri in base ai quali si sono definite le unità di Censimento con riferimento, anche, ai relativi caratteri considerati nelle tavole, nonchè i criteri adottati per la classificazione delle attività economiche. Si fa presente a tal fine che ulteriori notizie particolareggiate sono contenute nelle disposizioni emanate con la legge 2 aprile 1951, n. 291 sul Censimento, nelle norme per l'esecuzione della predetta legge, nonchè nelle apposite istruzioni predisposte per l'esecuzione del Censimento: argomenti, questi, esposti nel volume concernente gli « Atti del Censimento ».

1. - Ditta. — Per comodità di espressione, ed analogamente a quanto praticato nel precedente Censimento ed in altre rilevazioni, viene usato il termine « ditta » in luogo e come sinonimo di impresa (privata) od ente pubblico con finalità economiche.

Ai fini del Censimento si intende, pertanto, per « ditta » la unità giuridico-economica costituita dalla organizzazione dei fattori produttivi in funzione della produzione di beni e servizi.

Le ditte sono distinte in ditte artigiane e non artigiane. Sono considerate artigiane le ditte, di norma individuali, aventi una sola unità locale, che esplicano un'attività produttiva di beni materiali o di prestazione di servizi anche essi di natura materiale, di ordine artistico o comune e il cui titolare accentra tutte le funzioni inerenti alla gestione, impiegando la propria opera in modo continuativo nella lavorazione ed eventualmente nella istruzione degli apprendisti, senza o con l'aiuto dei familiari e/o di estranei; questi ultimi, in numero variamente limitato, in rapporto all'attività esercitata.

In relazione a tale definizione, nel questionario generale di ditta si sono inseriti alcuni quesiti tendenti ad accertare concretamente i caratteri distintivi dell'impresa artigiana quali, ad es. quelli relativi all'attività produttiva (produzione non in serie), alla partecipazione del titolare al lavoro manuale dell'azienda, ecc. Allo scopo di delimitare ulteriormente i caratteri dell'impresa artigiana si è tenuto conto, inoltre, di un apposito elenco, predisposto in precedenza, relativo alle attività che potevano essere svolte in forma artigianale.

I dati riportati nel presente volume sono comprensivi sia delle ditte artigiane, come ora intese, sia delle ditte non artigiane. Nella tavola 2 (parte I) i dati delle ditte artigiane sono esposti distintamente da quelli complessivi delle ditte.

È da avvertire, inoltre, che nel numero delle ditte del ramo del commercio non sono comprese quelle riguardanti il « commercio ambulante » (cfr. § 3).

2. - Unità locale. — È costituita dall'impianto o dal corpo di impianti situati in un dato punto del territorio, dove la ditta effettua materialmente le attività intese alla produzione di beni o alla prestazione di servizi; ne consegue che una medesima ditta può avere una o più unità locali. Le unità locali vengono distinte, a seconda del genere di attività svolta, in « unità operative », cioè stabilimenti, laboratori e simili, e in « unità amministrative », cioè uffici direttivi (tecnici ed amministrativi) aventi sede distinta da quella delle unità operative.

Per estensione della definizione, relativamente all'attività edilizia e all'installazione di impianti, come unità locali sono considerate il complesso di cantieri di una stessa ditta dislocati nel medesimo comune o l'insieme degli impianti gestiti dalla stessa ditta per l'esercizio di specifiche attività e dislocati nello stesso comune; per l'attività dei trasporti e delle comunicazioni, come unità locale si considera: per i trasporti terrestri e le comunicazioni, il complesso degli impianti e servizi di una stessa ditta dislocati nel medesimo comune; per i trasporti per via d'acqua, il complesso dei natanti gestiti da una stessa ditta e iscritti presso una stessa capitaneria di porto, se trattasi di trasporti marittimi e lagunari e presso uno stesso ispettorato di porto, se trattasi di trasporti fluviali e lacunali, nonchè il complesso delle attrezzature (magazzini, ecc.) gestiti dalla stessa

ditta nell'ambito delle predette unità territoriali ; per i trasporti aerei, il complesso degli aeromobili, impianti, depositi, ecc. gestiti da una stessa ditta in tutto il territorio nazionale.

È da avvertire, peraltro, che nelle attività sopraindicate, le sedi ed altri uffici direttivi o amministrativi, separati e funzionalmente distinti dai predetti impianti e servizi esecutivi, sono considerati come distinte unità locali.

3. - Commercio ambulante. — In relazione al particolare carattere del commercio ambulante, il Censimento di tale attività è stato effettuato, con le speciali modalità esposte nel citato volume concernente gli « Atti del Censimento », a mezzo di un unico apposito questionario, sostitutivo sia del questionario generale di ditta, sia del questionario generale di un'unità locale.

L'unità di censimento è costituita dall'esercizio di commercio ambulante, sia a posteggio fisso che mobile.

Sono compresi nel Censimento soltanto i titolari di licenza che esercitano il commercio ambulante come attività esclusiva o prevalente. Non sono pertanto compresi nel censimento gli esercizi il cui titolare :

a) gestisce contemporaneamente un negozio o un'azienda artigiana ;

b) vende direttamente la produzione propria in forma ambulante ;

c) esercita tale attività occasionalmente o in determinati periodi stagionali.

Non sono considerati venditori ambulanti coloro che vendono nei mercati all'ingrosso o su banchi fissi di mercati al minuto coperti, ovvero in chioschi, baracche e simili, fissati stabilmente al suolo, i cui dati, pertanto, sono compresi rispettivamente nel commercio all'ingrosso e nel commercio al minuto.

Nel presente volume i dati sul commercio ambulante sono esposti in appendice.

4. - Classificazione delle attività economiche. — La classificazione delle attività economiche è quella adottata nelle statistiche ufficiali italiane che si conforma, con gli opportuni adattamenti, alla corrispondente classificazione proposta in sede internazionale. Detta classificazione è basata sul criterio di raggruppamento delle unità locali secondo caratteri comuni relativi al genere di prodotti fabbricati o di servizi prestati.

Le varie attività economiche, come può constatarsi nell'allegato al presente volume, sono raggruppate in dieci grandi settori denominati « rami » ; ogni ramo è ripartito in « classi » e queste, a volte, in « sottoclassi » ; ogni classe e sottoclasse, infine, è ulteriormente articolata in « categorie », le quali costituiscono le componenti fondamentali della classificazione.

5. - Attività economiche rilevate dal Censimento. — Sono state rilevate tutte le attività inquadrate nei rami 2, 3, 4, 5, 6, 7 e 8 ; sono state escluse, invece, tutte le attività del ramo 1 (Agricoltura, silvicoltura, caccia e pesca). Per quanto riguarda i rami 9 (Attività e servizi vari) e 10 (Pubblica Amministrazione e istituzioni sociali varie), la rilevazione è stata limitata alle seguenti attività :

a) Ramo 9 — categoria 9.02.01 (Imprese dello spettacolo) appartenente alla classe 9.02 (Attività ricreative e affini) ; classe 9.03 (Servizi per l'igiene e la pulizia).

b) Ramo 10 — categorie 10.02.07 (Stabilimenti idroterapici) e 10.02.11 (Farmacie) appartenenti alla sottoclasse 10.02 C (Servizi sanitari) inquadrata, a sua volta, nella classe 10.02 (Servizi per l'istruzione, la previdenza, l'assistenza e la sanità pubblica).

Sono state rilevate tutte le unità di censimento, anche quelle di dimensioni minime o con attività svolte all'aperto, nonchè quelle inattive alla data di censimento perchè a ciclo stagionale o comunque per causa temporanea. Sono state escluse le unità dipendenti dal Ministero della Difesa, nonchè quelle relative ad attività svolte a domicilio per commissioni di fabbricanti e commercianti.

6. - Classificazione delle ditte e delle unità locali per attività economica. — In relazione all'accennato criterio di classificazione delle attività economiche, la classificazione delle ditte secondo l'attività economica è stata limitata ai rami, alle classi e sottoclassi che, essendo raggruppamenti di ordine superiore, permettono di inquadrare più univocamente le ditte secondo l'attività esercitata. Nel caso di ditte aventi attività comprese in più rami, classi o sottoclassi, esse sono comprese, con tutti gli addetti delle unità locali dipendenti, nel ramo, classe o sottoclasse di attività prevalente, risultante in genere dalla stessa dichiarazione dei censiti.

La classificazione delle unità locali per ramo, classe, sottoclasse e categoria di attività economica è effettuata sempre in base al criterio dell'attività, unica o prevalente, svolta nella unità locale, indipendente dalla classificazione delle rispettive ditte. Pertanto, mentre per le ditte aventi unità locali la cui attività riguarda un solo ramo o una sola classe o sottoclasse o categoria si ha coincidenza nella classificazione delle ditte e delle unità locali, tale corrispondenza non sussiste allorchè più unità locali di una stessa ditta esplicano attività inerenti a rami o classi differenti.

Le unità locali amministrative sono classificate, di massima, in base all'attività economica esercitata dalla ditta. Le unità amministrative (filiali, uffici amministrativi, ecc.) adibite, esclusivamente o prevalentemente, al servizio di unità operative sono classificate in base all'attività economica (unica o prevalente) esercitata dalle predette unità operative.

Nelle tavole del presente volume la denominazione delle classi, delle sottoclassi e delle categorie è, a volte, indicata in forma sintetica per esigenze tipografiche: le denominazioni complete risultano dall'apposito « Allegato ».

7. - Classificazione delle ditte e delle unità locali per circoscrizioni territoriali. — Per quanto concerne la classificazione delle ditte per circoscrizioni territoriali (Regione e Provincia) è da avvertire che sono attribuite ad una data circoscrizione le ditte aventi sede in un Comune della circoscrizione stessa, anche se alcune o tutte le unità locali dipendenti (esclusa quella riguardante la sede della ditta) alla data del Censimento risultavano in altra o altre circoscrizioni. Di conseguenza nel numero delle ditte di una qualsiasi Regione o Provincia non sono comprese quelle che, pur avendo una o più unità locali nella Regione o Provincia considerata, hanno la sede in un altra Regione o Provincia; per converso, le unità locali dislocate in circoscrizione diversa da quella ove ha sede la ditta alla quale esse appartengono, figurano nella circoscrizione sede di quest'ultima.

Per quanto concerne la classificazione delle unità locali (amministrative e operative) per Regione e Provincia è da avvertire che figurano appartenere a dette circoscrizioni le unità locali riferentesi ai Comuni della circoscrizione stessa, anche se esse appartengono a ditte aventi sede in altra circoscrizione.

8. - Addetti alle ditte e alle unità locali. — Il numero degli addetti, sia alle ditte che alle unità locali, comprende tutto il personale, fisso o saltuario, anche se provvisoriamente assente per servizio, licenza o malattia, occupato alla data di censimento nell'unità considerata.

Gli addetti riguardano le seguenti categorie:

a) *imprenditori, gerenti, ecc.* — Per le ditte individuali, il titolare o i titolari dell'azienda o della ditta o della licenza d'esercizio, sempre che partecipino direttamente alla gestione; per le società, la persona o le persone che risultano consiglieri delegati, ecc., dagli atti amministrativi della società;

b) *familiari coadiuvanti.* — Le persone di famiglia (parenti o affini) non necessariamente coabitanti o viventi a carico del titolare dell'azienda, il cui rapporto d'impiego non è regolato in base a contratti di lavoro;

c) *cooperatori.* — I lavoratori soci di cooperative di produzione e lavoro, i quali come corrispettivo dell'opera prestata non percepiscono una remunerazione regolata da contratti di lavoro, bensì un compenso proporzionato alla prestazione, nonchè una quota parte degli utili dell'azienda;

d) *dirigenti.* — Coloro che svolgono mansioni direttive aventi responsabilità ai fini della gestione della azienda;

e) *impiegati.* — Coloro che svolgono mansioni direttive non aventi, però, responsabilità ai fini della gestione dell'azienda, o mansioni di concetto o d'ordine. Nella I categoria sono compresi gli impiegati di concetto con funzioni direttive e simili; nella II categoria gli impiegati di concetto senza funzioni direttive; negli « altri » gli impiegati d'ordine;

f) *categorie speciali.* — I lavoratori che godono del trattamento previsto dal R.D.L. 13 novembre 1924, n. 18251 e il cui rapporto di lavoro è regolato dagli accordi interconfederali del 30 marzo e 23 maggio 1946, del 27 ottobre 1947 e dalle particolari successive disposizioni dei contratti di categoria, quali: contromaestro, caposquadra, marcatempo, ecc.;

g) *operai specializzati, qualificati, comuni e manovali.* — I lavoratori con mansioni manuali richiedenti competenza più o meno specifica;

h) *apprendisti.* — I lavoratori assunti per apprendere le mansioni d'impiegato d'ordine o di operaio richiedenti un certo tirocinio;

i) *altro personale.* — Quello non compreso nelle categorie precedenti, addetto alla vigilanza, alla custodia, ai servizi interni ausiliari, ecc.

Essendo stato adottato un questionario unico per tutte le attività economiche, è stata scelta per il personale addetto una classificazione tipo che potesse adattarsi, in linea di massima, alle diverse attività soggette al censimento.

Poichè alcune attività presentano un ordinamento particolare del personale, per esse è stata predisposto, in sede di rilevazione, un elenco delle qualifiche del personale addetto da comprendere in ciascuna categoria della classificazione tipo.

Pertanto, ai fini della corretta interpretazione dei dati pubblicati nel presente volume, si riportano in allegato le qualifiche del personale addetto ai trasporti e alle comunicazioni, al commercio e ai servizi compreso in talune categorie della classificazione tipo ; per le rimanenti categorie valgono le norme generali sopra specificate.

È da tener presente che i casi di unità locali senza addetti riguardano quelle temporaneamente inattive alla data di Censimento oppure con addetti che svolgevano prevalentemente la propria attività in altre unità locali.

9. - Classificazione delle ditte per forma giuridica. — Le ditte, in relazione alla loro forma giuridica, sono distinte in ditte individuali, società (per azioni, cooperative, in accomandita, in nome collettivo, a responsabilità limitata e altre) ed enti (statali, di diritto pubblico, altri).

Nel numero delle società sono comprese anche le società costituite all'estero aventi nel territorio dello Stato una o più sedi secondarie (unità locali) con rappresentanza stabile.

Le società per azioni comprendono anche le società con partecipazione dello Stato o di enti pubblici e le società di interesse nazionale ; le società cooperative comprendono le società cooperative a responsabilità limitata e quelle a responsabilità illimitata ; le società in accomandita comprendono le società in accomandita semplice e quelle in accomandita per azioni ; la voce « altre » raggruppa le società semplici e le società mutue assicuratrici.

Gli Enti statali e gli Enti di diritto pubblico comprendono le Ferrovie dello Stato, l'Azienda dei telefoni dello Stato, i Monopoli di Stato, le Banche, l'Istituto di ricostruzione industriale (I.R.I.), l'Istituto immobiliare italiano, le Regioni, le Provincie, i Comuni, ecc.

Gli « altri » Enti (persone giuridiche) comprendono gli Enti di beneficienza, i Circoli ricreativi assistenziali lavoratori (C.R.A.L.), le Associazioni con finalità economiche, ecc.

Tutti i predetti Enti, i cui dati sono stati rilevati in occasione del Censimento e che figurano nel presente volume, esplicano una qualsiasi attività nell'industria, nei trasporti e comunicazioni, nel commercio, nel credito e assicurazione o nei servizi.

10. - Classificazione delle ditte per diffusione territoriale. — Sono considerate a diffusione comunale le ditte che esplicano la loro attività nell'ambito del territorio di un solo Comune ; a diffusione provinciale quelle che hanno unità locali in più Comuni appartenenti però alla medesima Provincia ; a diffusione regionale quelle che hanno unità locali in Comuni facenti parte di più Provincie comprese in una sola Regione ; a diffusione nazionale quelle che hanno unità locali in Comuni appartenenti a Provincie di Regioni diverse.

Circa il numero degli addetti, si fa presente che nella tav. 4 (parte I) oltre al numero complessivo degli addetti è stato posto in evidenza il numero degli addetti alle unità locali della Provincia sede della ditta.

È da notare che in alcuni casi, rilevabili dalla predetta tavola, il numero complessivo di addetti appartenenti a ditte a diffusione regionale o nazionale è uguale a quello degli addetti alle unità locali della Provincia sede della ditta. Ciò è dovuto al fatto che sono state rilevate anche le unità locali inattive alla data di censimento e quelle i cui addetti prestavano prevalentemente la propria attività in altre unità locali.

11. - Motori primari, generatori di energia elettrica e motori elettrici installati. — Sono considerati motori primari (ad acqua, a vapore, a carburante liquido e gassoso, ecc.) quelli che trasformano in energia meccanica l'energia delle cascate d'acqua, del vapore, dell'olio carburante, del gas, ecc. ; generatori di energia elettrica quelli che trasformano l'energia meccanica dei motori primari in energia elettrica ; motori elettrici le macchine rotanti alimentate da energia elettrica (prodotta nelle stesse unità locali, oppure acquistata) che trasformano quest'ultima in energia meccanica per azionare macchine operative, attrezzi, utensili, ecc.

Nei motori primari sono comprese le turbine dei gruppi turboalternatori ; nei rigeneratori di energia elettrica sono compresi gli alternatori dei gruppi turbo-alternatori ed esclusi i trasformatori o convertirori di qualsiasi specie.

La potenza dei motori primari è espressa in HP (un HP equivale al lavoro di 75 kilogrammetri al secondo), quella dei generatori di energia elettrica (a corrente continua e a corrente alternata) e dei motori elettrici è, invece, espressa in kW (un HP corrisponde a 0,735 kW).

Ai fini di eventuali dubbi si precisa che i dati sugli impianti (motori primari ed elettrici, generatori di energia elettrica) esposti nelle tavole del presente volume fanno riferimento sia a quelli in esercizio alla data di censimento, sia a quelli in riserva : intendendosi tali gli impianti installati allo scopo di essere azionati solo in caso di mancato funzionamento, per qualsiasi causa, degli altri impianti. Sono esclusi i motori applicati ai mezzi di trasporto terrestri ed aerei, nonchè quelli dell'apparato propulsore dei trasporti per via d'acqua.

In ordine alla classificazione dei motori elettrici secondo la potenza si chiarisce, infine, che nella classe « fino a 1 kW » sono comprese le potenze da « 0,01 a 1 kW »; nella classe da « 1 a 5 kW » sono comprese le potenze da « 1,01 a 5 kW »; ecc.

12. - Potenza utilizzabile nelle unità locali. — Tale potenza (M) è stata determinata in base alla seguente formula:

$$M = (P - G) + E$$

dove P indica la potenza complessiva dei motori primari installati, G la parte di tale potenza assorbita dai generatori, ove esistano, per la trasformazione in energia elettrica, E la potenza dei motori elettrici installati. Di conseguenza l'espressione $P - G$ rappresenta la parte di potenza dei motori primari non trasformata in energia elettrica nell'unità locale.

Nel calcolo di cui sopra si fa astrazione delle perdite dovute alle resistenze passive (attrito, ecc.), alla trasformazione dell'energia nelle sue varie forme (meccanica, elettrica, ecc.) e al suo trasporto (potenza utilizzabile teorica).

I dati sulla potenza utilizzabile indicati nel presente volume sono espressi in HP; a tale fine si precisa che la potenza dei motori elettrici e dei generatori di energia elettrica, espressa, come già detto, in kW, è stata ridotta in HP in base al coefficiente 1,360.

Per quanto riguarda la classificazione delle unità locali secondo la potenza utilizzabile si richiama quanto detto al precedente paragrafo per la classificazione dei motori elettrici.

13. - Personale operaio e manovali in forza in ciascun mese del 1950. — Riguarda tutto il personale operaio (categorie speciali, operai specializzati, qualificati e comuni) e i manovali (specializzati e comuni) in forza nelle unità locali alla fine dell'ultimo periodo di paga di ciascun mese del 1950. Nel personale di cui sopra è incluso quello temporaneamente assente a tale data per servizio, licenza, malattia, ecc.

14. - Ore di lavoro prestate dal personale operaio e dai manovali in ciascun mese del 1950. — Le ore di lavoro riguardano quelle effettivamente prestate dal personale operaio e dai manovali (di cui al paragrafo precedente) in ciascun mese dell'anno 1950. Tali ore, desunte di norma dai libri paga o da altri documenti contabili prescritti per legge, comprendono anche quelle prestate nei giorni festivi o per lavoro straordinario. Sono, invece, escluse le ore di lavoro non effettivamente eseguite, ma conteggiate ai fini della corresponsione di premi e simili.

15. - Spese per il personale nel 1950. — Riguardano le retribuzioni lorde, le ritenute su tali retribuzioni a carico del personale e i contributi e le spese a carico del datore di lavoro, con riferimento: ai dirigenti e gestori (non titolari) e impiegati; agli operai, manovali, sorveglianti, apprendisti e altro personale. Dal detto personale sono esclusi i familiari coadiuvanti e i professionisti che prestano la loro opera a titolo di consulenza.

Le retribuzioni lorde comprendono le seguenti voci:

a) salari e stipendi. — In tale voce sono incluse oltre al salario e allo stipendio tutte quelle retribuzioni a carattere continuativo che costituiscono un supplemento del salario o stipendio quali ad es. indennità di contingenza, caropane, interessenza, provvigioni, lavoro straordinario, premi di rendimento;

b) altre retribuzioni. — Comprendono tutte le retribuzioni a carattere saltuario quali le somme corrisposte per ferie, festività, gratifiche, mensilità oltre la dodicesima, premi di anzianità, ecc., nonchè le corresponsioni in natura (fisse o saltuarie) dovute in base a contratto di impiego. L'importo di tali corresponsioni è valutato in base al prezzo di costo o di acquisto per le merci e in base ai prezzi di mercato per alloggio e servizi annessi, ovvero in base alle eventuali valutazioni convenzionali stabilite nei contratti di lavoro.

Le ritenute sulle retribuzioni lorde a carico del personale Riguardano le seguenti voci:

a) contributi per la previdenza sociale e gestioni collegate. — Riguardano i contributi per assicurazione contro la disoccupazione, per invalidità e vecchiaia, per assicurazione contro le malattie e infortuni, per assegni familiari, per la cassa integrazione, per l'I.N.A.-Casa, ecc.;

b) Ritenute erariali. — Riguardano le ritenute per R.M. e complementare per i dirigenti e impiegati e per la sola R.M. per gli operai, manovali ed altro personale.

I contributi e le spese a carico del datore di lavoro comprendono le seguenti voci:

a) *Contributi per la previdenza sociale e gestioni collegate.* — Riguardano i contributi per assicurazione contro la disoccupazione, per invalidità e vecchiaia, per assicurazione contro le malattie e infortuni, per assegni familiari, per cassa integrazione, per l'I.N.A.-Casa, ecc. ;

b) *Altri contributi e spese.* — Comprendono i contributi e le spese per asili, nidi di infanzia, colonie, organizzazioni ricreative, assistenza varia, ecc.

Dai dati esposti nel presente volume risulta, a volte, che le incidenze delle ritenute a carico del personale (o anche dei contributi a carico del datore di lavoro) sulle retribuzioni lorde corrisposte sono alquanto basse rispetto alla media generale : ciò è da attribuirsi al fatto che in alcuni casi, specie nelle unità artigiane, l'ammontare delle ritenute e dei contributi di cui sopra, nei questionari è stato indicato in modo approssimativo e qualche volta non è stato indicato.

16. - Altre avvertenze. — Ai fini di una corretta interpretazione dei dati esposti nella parte II (unità locali) del presente volume, si riportano qui di seguito alcune particolari avvertenze relative a determinati caratteri.

— I dati esposti nelle tavole 2, 4, 6 e 7 vengono limitati ai rami da 2 a 6 in quanto per le attività del commercio, del credito e assicurazione e dei servizi i dati sulla forza motrice e sulla potenza installata sono di scarso interesse.

— I dati esposti nelle tavole 8 e 9 (presenze operai e ore di lavoro nel 1950) vengono limitati ai rami da 2 a 5 in quanto per gli altri rami i dati stessi non sono stati rilevati.

17. - Segni convenzionali. — Nelle tavole del presente volume sono usati i seguenti segni convenzionali :

linea — quando il fenomeno non esiste oppure quando esiste ma i casi non si sono verificati ;

due puntini .. quando i dati non raggiungono la cifra significativa dell'ordine minimo considerato (ad es., un HP per la potenza dei motori).
