## TAVOLE ILLUSTRATE

# introduzione

## 1. — PREMESSA

Il 12° Censimento generale della popolazione e il Censimento generale delle abitazioni sono stati effettuati con riferimento alla data del 25 ottobre 1981, in attuazione della legge 18 dicembre 1980, n. 864 e del relativo regolamento di esecuzione (D.P.R. 28 settembre 1981, n. 542).

Il piano della rilevazione è stato predisposto sulla base delle proposte formulate da un'apposita Commissione di studio istituita presso l'Istituto Centrale di Statistica della quale hanno fatto parte docenti universitari e rappresentanti di Amministrazioni Pubbliche, nonché di vari Enti interessati all'utilizzazione dei dati censuari.

Il piano di pubblicazione, modificato rispetto al 1971, in particolare per quanto riguarda la disponibilità dei risultati in funzione delle diverse aggregazioni territoriali, si articola nel modo seguente:

Volume I — **Primi risultati provinciali e comunali sulla popolazione e sulle abitazioni (Dati provvisori)** (Maggio 1982)

Volume II — **Dati sulle caratteristiche strutturali della popolazione e delle abitazioni**

Tomo 1 — Fascicoli provinciali (95 fascicoli)

Tomo 2 — Fascicoli regionali (20 fascicoli)

Tomo 3 — Fascicolo nazionale

Volume III — **Popolazione delle frazioni geografiche e delle località abitate dei Comuni** (20 fascicoli regionali e 1 fascicolo nazionale).

Volume IV — **Atti del censimento.**

Un apposito volume riporta i dati sulla popolazione residente legale dei singoli Comuni, un altro, infine, sarà dedicato ad una relazione illustrativa ed interpretativa dei risultati censuari.

Il presente fascicolo consta di otto tavole:

**Tavola 1 — Superficie territoriale e densità. Numero delle frazioni geografiche, dei centri e dei nuclei. Popolazione residente per tipo di località abitata.**

**Tavola 2 — Popolazione residente per zona altimetrica, per tipo di località abitata e provincia.**

**Tavola 3 — Comuni per superficie territoriale e provincia.**

**Tavola 4 — Comuni per altitudine del capoluogo e provincia.**

**Tavola 5 — Comuni per ampiezza demografica, zona altimetrica e provincia.**

- A — Montagna
- B — Collina
- C — Pianura
- D — Totale

**Tavola 6 — Frazioni geografiche per provincia; abitate per ampiezza demografica, disabilitate.**

**Tavola 7 — Centri abitati per ampiezza demografica e provincia.**

**Tavola 8 — Nuclei abitati per ampiezza demografica e provincia.**

Qui di seguito vengono riportate ed illustrate le definizioni dei caratteri ai quali si riferiscono i dati contenuti nel fascicolo; allo scopo di assicurare una esatta interpretazione dei dati stessi, vengono, inoltre, fornite avvertenze per alcuni aspetti particolari, nonché talune indicazioni sugli ulteriori canali di accesso all'informazione censuaria e sulla qualità dei risultati.

Per una più completa conoscenza delle modalità tecniche seguite per l'esecuzione del censimento, vedasi il fascicolo dell'Istituto Centrale di Statistica - 12° Censimento della popolazione e 6° Censimento dell'industria, del commercio, dei servizi e dell'artigianato, 25-26 ottobre 1981, *Disposizioni e istruzioni per gli Organi periferici*, Roma 1981.

Le denominazioni e le circoscrizioni territoriali dei Comuni, delle Province e delle Regioni fanno riferimento alla situazione esistente alla data del 25 ottobre 1981 (Cfr. Istituto Centrale di Statistica - *Elenco dei Comuni al 25 ottobre 1981*, Roma 1982).

## **2. — DEFINIZIONI**

**2.1 — Zone altimetriche** - a) Zona altimetrica di Montagna - Per «zona di montagna», ai fini statistici, s'intende il territorio caratterizzato dalla presenza di notevoli masse rilevate aventi altitudini, di norma, non inferiori a 600 metri nell'Italia settentrionale e 700 metri nell'Italia centro-meridionale e insulare.

Gli anzidetti livelli altitudinali sono suscettibili di spostamento in relazione ai limiti inferiori delle zone fitogeografiche dell'*Alpinetum*, del *Picetum* e del *Fagetum*, nonché in relazione ai limiti superiori delle aree di colture in massa della vite nell'Italia settentrionale e dell'olivo nell'Italia centro-meridionale e insulare.

Le aree intercluse fra le masse rilevate, costituite da valli, altipiani ed analoghe configurazioni del suolo, s'intendono comprese nella zona di montagna.

b) Zona altimetrica di collina - Per «zona di collina», ai fini statistici, s'intende il territorio caratterizzato dalla presenza di diffuse masse rilevate aventi altitudini, di regola, inferiori a 600 metri nell'Italia settentrionale e 700 metri nell'Italia centro-meridionale e insulare, salvo variazioni corrispondenti ai limiti inferiori delle zone fitogeografiche dell'*Alpinetum*, del *Picetum* e del *Fagetum*, nonché ai limiti superiori delle aree della coltivazione in massa, rispettivamente, della vite e dell'olivo.

Eventuali aree di limitata estensione aventi differenti caratteristiche, intercluse, si considerano comprese nella zona di collina.

c) Zona altimetrica di pianura - Per «zona di pianura», ai fini statistici, s'intende il territorio basso e pianeggiante caratterizzato dall'assenza di masse rilevate.

Si considerano nella zona di pianura anche le propaggini di territorio che nei punti più discosti dal mare si elevino ad altitudine, di regola, non superiore ai 300 metri, purché presentino nell'insieme e senza soluzione di continuità, inclinazione trascurabile rispetto al corpo della zona di pianura.

Si escludono dalla pianura i fondovalle aperti ad essa oltre l'apice delle conoidi fluviali ancorché appiattite e si escludono, altresì, le strisce litoranee pianeggianti di modesta estensione.

Eventuali rilievi montagnosi o collinari, interclusi nella superficie pianeggiante e di estensione trascurabile, si considerano compresi nella zona di pianura.

Tenuto conto dell'azione moderatrice sul clima da parte del mare le zone altimetriche di montagna e di collina sono state divise, rispettivamente, in zone altimetriche di *montagna interna* e *collina interna* e di *montagna litoranea* e *collina litoranea*, comprendendo in queste ultime i territori, esclusi dalla zona di pianura, bagnati dal mare o in tale prossimità di esso, da risentire notevolmente i benefici effetti climatici.

La realizzazione della ripartizione in zone altimetriche è stata effettuata per fasi successive: le zone stesse sono state delimitate preliminarmente, con criteri fitogeografici, su carte alla scala 1 : 500.000, tenendo conto di numerosi elementi e spesso compiendo indagini locali; successivamente le delimitazioni ottenute sono state riportate su di un'unica carta alla scala 1 : 1.000.000, onde avere una visione d'insieme delle zone altimetriche. Infine tali delimitazioni, con un ulteriore lavoro di affinamento sulle carte topografiche alla scala 1 : 100.000 e 1 : 25.000, sono state rese definitive sulle carte alla scala 1 : 250.000, portandole a coincidere con i confini amministrativi dei comuni.

Molte difficoltà di ordine pratico che si sono dovute superare derivarono dalla norma di costituire le zone altimetriche con raggruppamenti di comuni, moltissimi dei quali, in relazione all'ambiente geografico ed alla loro origine storica, si estendono territorialmente dalla montagna alla collina o dalla collina alla pianura, coprendo, talvolta, tutte e tre queste zone altimetriche.

Se si fosse ammessa la possibilità di suddivisione del territorio di un comune secondo le zone altimetriche comprese nel territorio stesso, il problema della corretta attribuzione di questi alle varie zone altimetriche ne sarebbe risultato facilitato. Ma questo vantaggio sarebbe stato praticamente annullato dalla impossibilità di seguire analoga ripartizione per le rilevazioni dei vari fenomeni nell'ambito comunale, a ciò ostando, fra l'altro, ragioni di carattere amministrativo e tecnico.

**2.2 — Frazioni geografiche e località abitate** - Le frazioni geografiche e le località abitate di ciascun Comune sono quelle individuate e delimitate sul piano topografico formato dai Comuni stessi con le tavolette al 25.000 dell'Istituto Geografico Militare e approvato dall'Istituto Centrale di Statistica (\*).

Gli aspetti particolari appresso indicati delle frazioni geografiche e delle località abitate sono posti in evidenza nei fascicoli regionali con apposite note alle tavole 2 e 3 di ciascuna Provincia.

(\*) Le istruzioni per la formazione del piano topografico sono riportate in allegato al fascicolo dell'Istituto Centrale di Statistica «Anagrafe della popolazione» - Metodi e Norme - Serie B, n. 18 - giugno 1979.

**2.3 — Frazione geografica** - Area del territorio comunale comprendente almeno un centro abitato, nonché nuclei abitati e case sparse gravitanti sul centro o sui centri abitati. Sono considerate, inoltre, frazioni geografiche a se stanti, anche se disabitate:

- a) le isole amministrative, cioè le parti di territorio comunale circondate interamente dal territorio di altro o altri Comuni, e le isole marittime o lacuali;
- b) le zone di territorio che hanno il proprio luogo di raccolta nel territorio di altro Comune, anche se comprendono centri temporanei;
- c) le zone di territorio di alta montagna completamente disabitate, le paludi, gli acquitrini e i laghi appartenenti ad un solo Comune, purché di una certa ampiezza;
- d) la parte di lago spettante a ciascun Comune, qualora il lago risulti diviso tra più Comuni;
- e) le zone di territorio in contestazione tra due o più Comuni.

**2.4 — Località abitata** - Area più o meno vasta di territorio, conosciuta di norma con un nome proprio, sulla quale sono situate una o più case raggruppate o sparse.

I tipi di località considerati sono: il centro abitato, il nucleo abitato, le case sparse.

— *Centro abitato*: aggregato di case contigue o vicine con interposte strade, piazze e simili, o comunque brevi soluzioni di continuità, caratterizzato dall'esistenza di servizi od esercizi pubblici determinanti un luogo di raccolta ove sogliono concorrere anche gli abitanti dei luoghi vicini per ragioni di culto, istruzione, affari, approvvigionamenti e simili.

Sono considerate «centri abitati temporanei» le località turistiche, di cura e villeggiatura non abitate continuativamente aventi, però, nel periodo di attività stagionale, i requisiti del centro abitato.

— *Nucleo abitato*: aggregato di case contigue o vicine, con almeno cinque famiglie residenti, privo del luogo di raccolta che caratterizza il centro abitato. Il carattere di nucleo abitato è, inoltre, riconosciuto:

- a) al gruppo, anche minimo, di case situate in zona montana, quando vi abitino almeno due famiglie e le condizioni della viabilità siano tali da rendere difficili e comunque non frequenti i rapporti con le altre località abitate;
- b) all'aggregato di case (dirute e non dirute) in zona montana, già sede di popolazione e, alla data del censimento, completamente o parzialmente disabitato per il noto fenomeno dello spopolamento montano;
- c) ai fabbricati di aziende agricole e zootecniche (cascine, fattorie, masserie, ecc), anche se costituiti da una sola unità, purché il numero delle famiglie ivi abitanti non sia inferiore a cinque;
- d) ai conventi, alle case di cura, alle colonie climatiche e sanatoriali, agli orfanotrofi, alle case di correzione, alle scuole-convitto situati in aperta campagna;
- e) agli edifici distanti da centri e nuclei abitati, con servizi od esercizi pubblici (stazione ferroviaria, centrale idroelettrica, spaccio, chiesa, ecc.), purché negli stessi o nelle eventuali case prossime, da comprendere nel nucleo, abitino almeno due famiglie;
- f) agli aggregati di case con popolazione non stabile, di case, cioè, adibite quasi esclusivamente a residenza secondaria, anche se, alla data del censimento, completamente o parzialmente disabitate.

— *Case sparse*: case disseminate per la campagna o situate lungo strade e tali da non poter costituire nemmeno un nucleo abitato.

I centri e i nuclei abitati possono risultare costituiti da case situate nel territorio di due o più Comuni confinanti; in tal caso, ferma restando la competenza territoriale dei Comuni, gli agglomerati di case al di qua e al di là della linea di confine sono considerati centri abitati o nuclei abitati tra loro contigui.

**2.5 — Popolazione residente** - La popolazione residente di ciascun Comune è costituita dalle persone aventi dimora abituale nel Comune ed ivi presenti alla data del censimento e dalle persone aventi anch'esse dimora abituale nel Comune, ma che alla data del censimento risultavano assenti per uno dei seguenti motivi:

- emigrazione in altro Comune o all'estero, nel caso si tratti di emigrazione per l'esercizio di occupazioni stagionali o temporanee;
- servizio di leva, di richiamo alle armi, di volontariato;
- istruzione, noviziato religioso;
- ricovero in istituti di cura, di qualsiasi natura, purché la permanenza nel Comune di temporanea presenza non superi i due anni;
- detenzione in attesa di giudizio, condanna inferiore a cinque anni, obbligo di soggiorno per misura di prevenzione, rieducazione, purché la permanenza nel Comune di temporanea presenza non superi i cinque anni;
- affari, turismo, breve cura e simili;
- servizio statale all'estero;
- missione fuori sede, compresa la frequenza di corsi di qualificazione o aggiornamento professionali, nonché di avanzamento;
- imbarco su navi della marina militare e mercantile.

La popolazione residente, a norma dell'art. 2 del D.P.R. 542 del 28 settembre 1981, è considerata popolazione legale. Il relativo ammontare per Comuni, Province e Stato è pubblicato sulla G.U. n. 95 del 7 aprile 1983, Supplemento ordinario n. 17.

### **3. — DIFFUSIONE DEI DATI**

Allo scopo di favorire un'ampia utilizzazione dei dati raccolti con il censimento si precisa quanto segue:

- le tavole pubblicate nel presente fascicolo possono essere fornite su nastro magnetico;
- le richieste comportano il rimborso delle spese vive sostenute per l'approntamento del supporto e devono essere inoltrate a: Istituto Centrale di Statistica, Reparto Censimenti della popolazione, via Cesare Balbo n. 16 - 00100 Roma.

### **4. — QUALITÀ DEI DATI**

**4.1 — Generalità** - Il problema del controllo della qualità dei dati, che costituisce una delle fasi più delicate di ogni indagine statistica, si presenta ancor più accentuato in occasione delle operazioni censuarie, dalla raccolta dei dati alla pubblicazione dei risultati.

Circa la procedura di controllo che l'Istituto ha adottato nelle varie fasi delle operazioni censuarie per assicurare in generale il più alto livello di attendibilità e coerenza dei risultati, si rimanda all'introduzione al Volume II (paragrafo 5), *Dati sulle caratteristiche strutturali della popolazione e delle abitazioni*.

Qui di seguito si accenna brevemente alle operazioni di verifica effettuate per assicurare, nei limiti del possibile, la necessaria accuratezza nella delimitazione delle frazioni geografiche e delle località abitate e il più alto grado di esattezza dei dati sulla relativa popolazione residente.

**4.2 — Frazioni geografiche** - Occorre precisare che le frazioni geografiche sono entità statistiche di studio dell'assetto della popolazione sul territorio. Esse non interferiscono con altre ripartizioni d'ordine politico-amministrativo del territorio comunale.

Poiché le frazioni geografiche sono determinate dall'attrazione che i centri abitati — in quanto dotati di servizi ed esercizi pubblici — esplicano nei confronti della popolazione delle località vicine di grado inferiore (nuclei abitati e case sparse), ne consegue che la loro individuazione dipende, oltre che dalla configurazione fisica dei luoghi, anche dalle strutture urbanistiche che variano più o meno intensamente nel corso del tempo.

Al riguardo devesi rilevare che le trasformazioni intervenute nella realtà urbanistica, rispetto al passato censimento, hanno comportato l'eliminazione di un certo numero di frazioni geografiche.

In genere si è trattato di frazioni geografiche che avevano perduto l'individualità propria della frazione geografica. Ciò è avvenuto di norma a causa dello sviluppo dell'attività edilizia, che ha determinato il congiungimento di centri abitati prima a se stanti o che, comunque, ha modificato l'assetto della popolazione sul territorio.

Talora, pur essendo la situazione urbanistica rimasta immutata, si è reso necessario eliminare alcune frazioni geografiche in quanto esse sono risultate prive dei requisiti richiesti.

**4.3 — Località abitate** - Particolare cura è stata posta nel verificare che la rappresentazione cartografica dei centri e dei nuclei abitati corrispondesse al loro effettivo sviluppo edilizio. Nei casi di mancato aggiornamento delle tavolette al 25.000 si è provveduto a richiedere ai Comuni planimetrie e rilievi recenti del territorio comunale, al fine di perfezionare le delimitazioni delle località abitate con riferimento alla continuità fisica dei rispettivi aggregati abitativi.

**4.4 — Determinazione della popolazione per frazioni geografiche e località abitate** - La determinazione dei dati sulla popolazione per frazioni geografiche e località abitate ha richiesto un complesso lavoro di revisione delle risultanze censuarie. Hanno formato oggetto di approfondito esame comparativo i seguenti elaborati censuari:

a) cartografia (tavolette I.G.M. al 25.000) contenente le delimitazioni delle circoscrizioni territoriali dei Comuni, nonché le delimitazioni delle frazioni geografiche e delle località abitate: trattasi dei piani topografici del censimento redatti dai Comuni ed approvati dall'Istituto Centrale di Statistica;

b) cartografia contenente le delimitazioni delle sezioni di censimento (terzo esemplare dei piani topografici e/o altra cartografia a scala maggiore);

c) tabulati contenenti i toponimi delle frazioni geografiche e delle località abitate con i relativi dati di altitudine;

d) stati di sezione definitivi: trattasi dei modelli ISTAT/CP/9 contenenti l'elenco dei fogli di famiglia e di convivenza secondo la frazione geografica e la singola località di appartenenza e con l'indicazione delle principali notizie sulla popolazione e sulle abitazioni;

e) tabulati contenenti la popolazione di ciascuna sezione di censimento per tipo di località abitata: trattasi di tabulati ottenuti dallo spoglio meccanografico dei fogli di famiglia e di convivenza in funzione del quesito sul tipo di località abitata (centro abitato, nucleo abitato, case sparse).

L'esame comparativo delle due serie di cartografia ha avuto lo scopo di verificare la regolarità delle delimitazioni delle sezioni di censimento rispetto alle delimitazioni delle frazioni geografiche e delle località abitate. Al riguardo occorre ricordare che la suddivisione del territorio comunale in sezioni di censimento doveva rispondere ai seguenti criteri:

- le sezioni di censimento dovevano essere costituite nell'ambito di ciascuna frazione geografica e/o circoscrizione amministrativa;
- una sezione di censimento non doveva comprendere più centri abitati o più nuclei abitati, ma un solo centro abitato o un solo nucleo abitato;
- mentre un centro abitato poteva essere scomposto in più sezioni di censimento in considerazione della sua dimensione, un nucleo abitato non doveva mai essere scisso in più sezioni di censimento;
- per le case sparse dovevano essere costituite preferibilmente sezioni di censimento a sé stanti, a meno che non si fosse trattato di: 1) case sparse che, tenuto conto del carattere urbanizzato del territorio in cui insistevano, potevano essere considerate come una appendice dei centri abitati vicini; in tal caso era opportuno che le case sparse fossero comprese nella stessa sezione di censimento relativa al centro abitato su cui gravitavano, pur conservando la qualificazione di case sparse che loro competeva in conseguenza della dislocazione abbastanza distanziata l'una dall'altra; 2) case sparse situate in una contrada di cui faceva parte anche un centro o un nucleo abitato; in tal caso, al fine di conservare l'unitarietà della contrada, poteva essere utile comprendere nella stessa sezione di censimento relativa al centro o al nucleo abitato anche le case sparse circonvicine.

Una volta verificata la configurazione delle sezioni di censimento rispetto alle frazioni geografiche e alle località abitate, è stato effettuato un ulteriore controllo per accertare che tutte le frazioni geografiche e località abitate rappresentate sulla cartografia e già registrate su nastro magnetico trovassero esatta corrispondenza con quelle elencate sugli statuti di sezione definitivi di cui al punto *d*). In tutti i casi di mancata corrispondenza si è provveduto a sviluppare una serie di contatti con i Comuni interessati, prevalentemente tramite telefono, invio di lettere e visite in loco, per concordare le rettifiche da apportare ai piani topografici e/o ai modelli ISTAT/CP/9 in ordine alla distribuzione dei fogli di famiglia e di convivenza per frazioni geografiche e località abitate.

Le risultanze dei modelli ISTAT/CP/9 come sopra corretti sono state messe a confronto con i dati sulla popolazione residente per sezione di censimento e per tipo di località abitata contenuti nel tabulato di cui al punto *e*).

L'anzidetto confronto ha consentito di individuare sul tabulato stesso:

- f)* le sezioni del censimento che discordavano dai modelli ISTAT/CP/9 quanto alla distribuzione della popolazione per tipo di località abitata;
- g)* le sezioni di censimento in ciascuna delle quali erano state comprese, in contrasto con le disposizioni impartite dall'Istituto Centrale di Statistica, più località abitate dello stesso tipo (più centri abitati o più nuclei abitati).

Nelle sezioni di censimento di cui al punto *f*) sono stati rettificati i dati di popolazione per tipo di località abitata in base alle risultanze dei modelli ISTAT/CP/9.

Le sezioni di censimento di cui al punto *g*) sono state scisse in tante sezioni quante erano le località abitate dello stesso tipo in esse comprese, allo scopo di poter stabilire una correlazione biunivoca tra sezioni di censimento e località abitate.

Si è, quindi, proceduto alla codificazione e registrazione delle sezioni di censimento con i dati del tabulato di cui al punto *e*), in modo che ad ogni sezione di censimento fossero abbinati i codici della frazione geografica e della località abitata corrispondenti.

Dall'abbinamento del *file* delle frazioni geografiche e delle località abitate con il *file* delle sezioni di censimento come sopra codificate e registrate è stato ottenuto il nastro contenente i dati di popolazione residente e di altitudine delle frazioni geografiche e delle località abitate dei Comuni contenuti nella presente pubblicazione.

È appena il caso di avvertire che lo stabilito collegamento delle sezioni di censimento con le corrispondenti frazioni geografiche e località abitate potrà essere utilizzato per disaggregare meccanograficamente i dati censuari secondo le anzidette entità territoriali sub-comunali.

## 5. — AVVERTENZE PARTICOLARI

5.1 — **Caratteri tipografici:** per facilitare la lettura, le denominazioni delle entità territoriali considerate nelle tavole 2 e 3 dei fascicoli regionali, sono state evidenziate con caratteri tipografici differenti e precisamente: COMUNI in maiuscolo nero, FRAZIONI GEOGRAFICHE in maiuscolo chiaro, CENTRI ABITATI in maiuscolo chiaro di corpo più piccolo, NUCLEI ABITATI in minuscolo chiaro, CASE SPARSE in minuscolo inclinato chiaro.

5.2 — **Altitudine:** per i Comuni e le frazioni geografiche è stata indicata l'altitudine massima e minima del rispettivo territorio; tali valori sono stati determinati prescindendo dalle altitudini concernenti le zone di territorio in contestazione fra Comuni.

L'altitudine dei centri abitati si riferisce al principale luogo di raccolta (di norma la piazza del municipio o della chiesa parrocchiale o del mercato); l'altitudine dei nuclei abitati fa riferimento ad un punto intermedio del terreno su cui sorgono le case dei nuclei stessi.

5.3 — **Casa comunale:** la località abitata (generalmente il centro capoluogo) ove è situata la casa comunale, è contrassegnata con asterisco.

5.4 — **Elenco in ordine alfabetico delle località abitate** — In considerazione della rilevanza giuridica che varie disposizioni di legge o regolamentari attribuiscono all'entità della popolazione delle località abitate (cfr., ad esempio, Provvedimento C.I.P. n. 949 dell'11/11/1961 - Contributi di allacciamento per l'energia elettrica; legge 8/3/1968 n. 221 - Provvedimenti a favore dei farmacisti rurali; D.P.R. 27/10/1976 n. 800 - Norme in materia di tariffe telefoniche), si è ritenuto opportuno fornire, nella tavola 3 dei fascicoli regionali, l'elenco completo in ordine alfabetico delle località abitate di ciascuna Provincia con l'indicazione sia delle classi di ampiezza demografica, sia dei Comuni di appartenenza mediante i codici meccanografici dei Comuni stessi. Le classi di ampiezza demografica considerate sono state indicate come segue:

- \* fino a 199 abitanti
- \*\* da 200 a 1999 abitanti
- \*\*\* 2000 abitanti ed oltre.

5.5 — **Variazioni territoriali:** l'elenco dei Comuni che hanno subito variazioni territoriali e di nome tra il 1971 e il 1981 è riportato in Appendice (parte A) ai fascicoli regionali.

5.6 — **Superficie territoriale:** i dati della superficie territoriale dei Comuni sono stati forniti dagli Uffici Tecnici Erariali; si fa presente che eventuali variazioni di superficie di minima entità non segnalate in detta Appendice sono conseguenti a verifiche periodiche effettuate dagli stessi Uffici Tecnici Erariali.

5.7 — **Territori in contestazione** — Premesso che, allo scopo di evitare omissioni o duplicazioni, la rilevazione censuaria nei territori in contestazione tra due o più Comuni è stata affidata ad uno solo dei Comuni interessati, occorre precisare quanto segue:

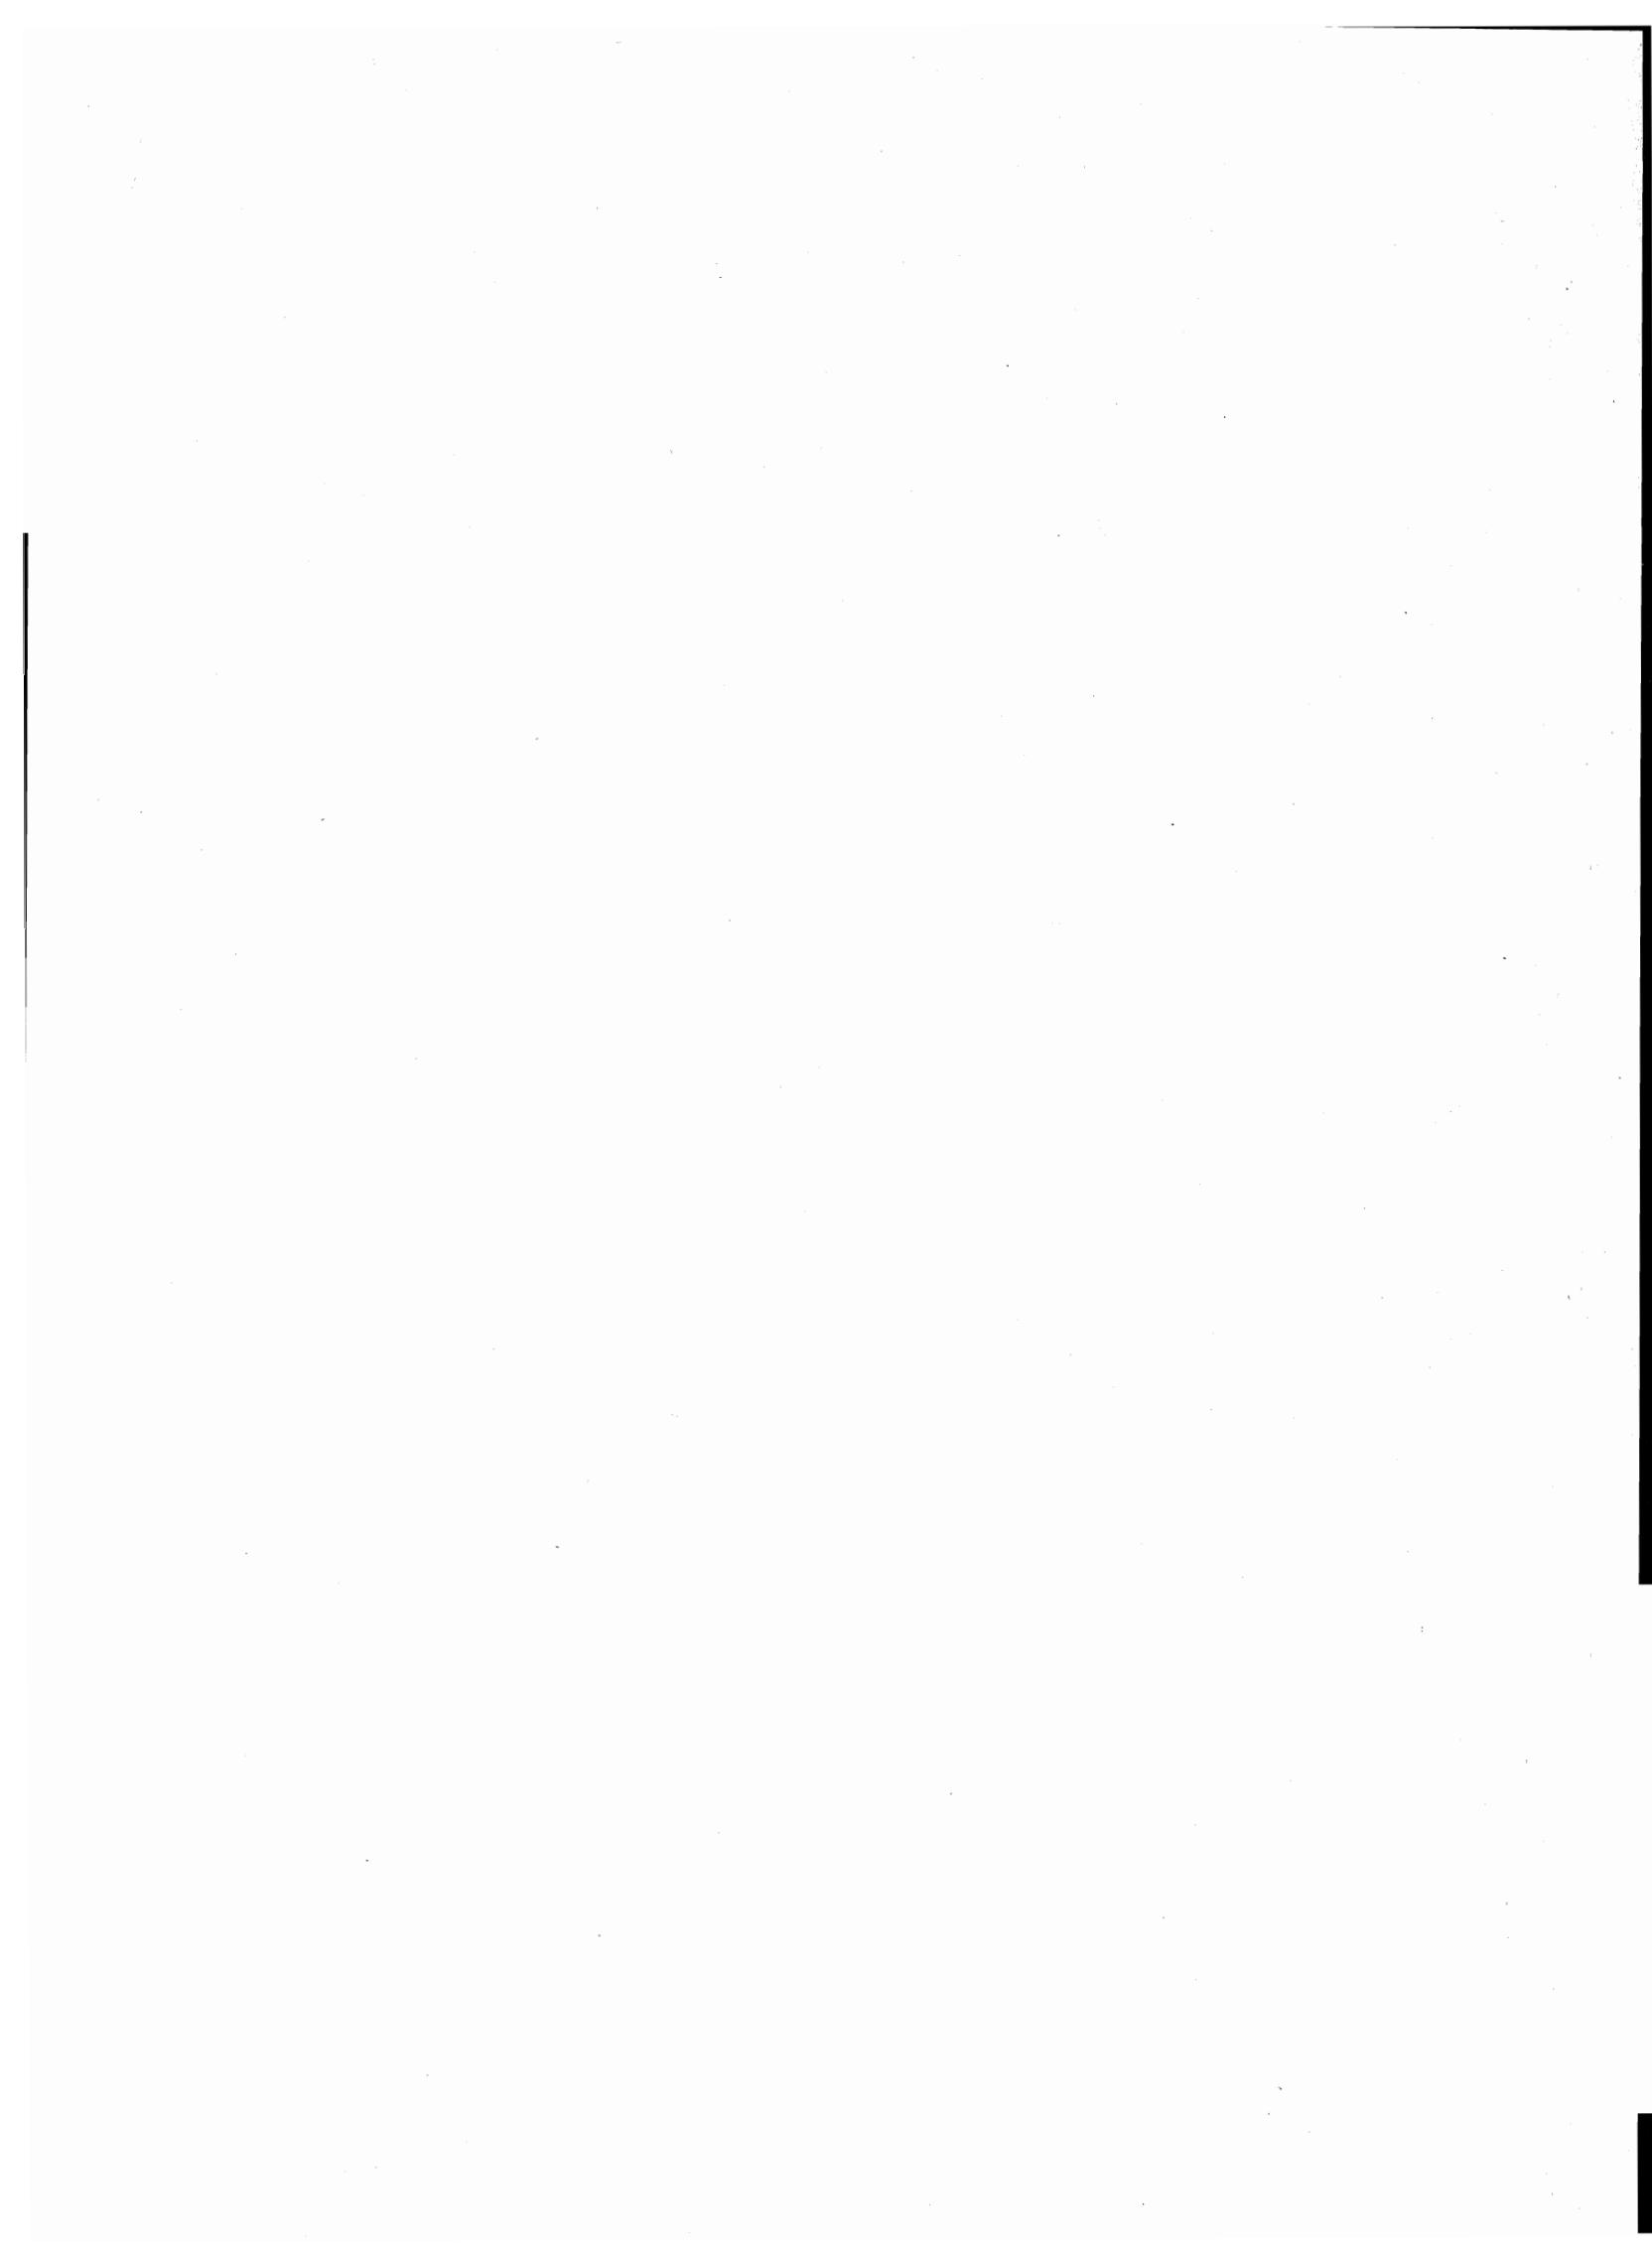

a) permanendo irrisolta la controversia territoriale, i territori in contestazione sono stati riportati sulla Tav. 2 dei fascicoli regionali in corrispondenza di ciascuno dei Comuni interessati; ovviamente, ai fini del calcolo del numero delle frazioni geografiche, dei centri abitati e dei nuclei abitati, riportato nella Tav. 1 dei medesimi fascicoli, essi sono stati considerati una sola volta e, precisamente, nell'ambito del Comune incaricato della rilevazione censuaria;

b) le controversie insorte in ordine all'appartenenza all'uno o all'altro Comune della popolazione residente nei territori oggetto di contestazione sono state risolte in base alle risultanze anagrafiche, nel senso che sono state computate nella popolazione di ciascun Comune le famiglie che risultavano di fatto iscritte nella rispettiva anagrafe della popolazione residente;

c) le superfici delle zone di territorio in contestazione, riportate in Appendice (parte B) ai fascicoli regionali, costituiscono un « di cui » delle superfici totali dei Comuni.

Ai fini dell' imputazione delle superfici contestate alla superficie totale dell'uno o dell'altro Comune interessato, si è avuto riguardo alle circoscrizioni comunali quali risultano delimitate sulle carte topografiche al 25.000 edite dall'Istituto Geografico Militare, nel presupposto che tali circoscrizioni facciano riferimento alle medesime risultanze catastali da cui sono desunte le superfici dei Comuni.

In mancanza di altro valido criterio, l'attribuzione delle superfici contestate è stata necessariamente omessa nei pochi casi in cui i confini comunali sono rimasti indefiniti anche sulla cartografia I.G.M.
