

Italy in figures

ITALY'S NUMBERS

Main territorial and demographic data

LATITUDE	47° e 06' North; 35° e 30' South	RAILWAY NETWORK	15,965 km
LONGITUDE	-5° e 50' West; 6° e 04' East	ROAD NETWORK	172,178 km
MAXIMUM SPAN	1,200 km	REGIONS	20
TERRITORIAL SURFACE	301,336 kmq	PROVINCES	103
TOTAL SURFACE OF WOODS	68,558 kmq	MUNICIPALITIES	8,101
TOTAL LENGTH OF SEA COASTS	7,375 km	RESIDENT POPULATION	58.5 millions
SURFACE AT HIGH SEISMIC RISK	27,646 kmq	RESIDENT FOREIGNERS	2 millions
PROTECTED AREAS	57,325 kmq	NUMBER OF HOUSEHOLDS	23.3 millions
HIGHEST MOUNTAIN	Monte Bianco (4,810 m)	HOUSEHOLDS' AVERAGE MEMBERS	2.5
LONGEST RIVER	Po (652 km)	POPULATION DENSITY	194 inhab./km2

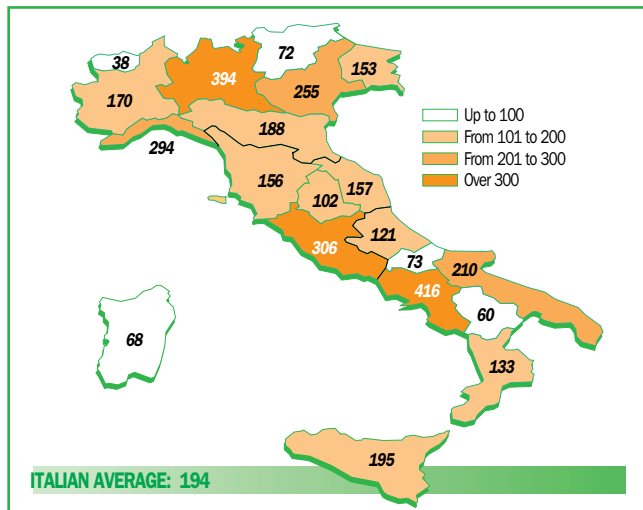

North: Piemonte, Valle d'Aosta, Liguria, Lombardia, Trentino-Alto Adige, Friuli-Venezia Giulia, Veneto, Emilia-Romagna

Centre: Toscana, Lazio, Umbria, Marche

South: Abruzzo, Molise, Campania, Basilicata, Puglia, Calabria, Sicilia, Sardegna

RESIDENT POPULATION DENSITY

Inhabitants per km², 1 January 2005

Resident population: italian and foreign citizens registered in municipal Register Offices

key points

Natural balance:

difference between the number of births and the number of deaths among the resident population occurred both in Italy and abroad

Registration and removals balance:

difference between the number of new registrations in and the number of removals from the Register Offices among the resident population occurred in Italy. New registrations and removals may be due to relocation from/to another Italian municipality; or relocation from/to a foreign country; or other register rectification operations

FOREIGN RESIDENT POPULATION WITH REFERENCE TO THE CENSUS DAY

Residence permits:

for all those foreigners who are legally present in Italy, i.e. holders of a valid document issued by the Italian police authorities, with the exception of minors who in the majority of cases do not have their own permit and are recorded in their parents' papers

RESIDENCE PERMITS 1 JANUARY 2003

ESTIMATION OF RESIDENT POPULATION

Millions of people, 2010-2050

DEMOGRAPHIC INDICATORS

Censuses 1961-2001 and 1 January 2002-2005

LIFE EXPECTANCY AT BIRTH BY SEX

1961-2004

* estimated data

AVERAGE NUMBER OF CHILDREN PER WOMAN

1961	2.41
1971	2.41
1981	1.60
1991	1.35
2001	1.25
2003*	1.29
2004**	1.33

* provisional data
** estimated data

Ageing ratio: ratio of population aged 65 and over to population aged 0-14, per 100

Dependency ratio: ratio of non-working age population (0-14; 65 and over) to working age population (15-64), per 100

Life expectancy at birth: average number of years a new-born is expected to live

MOTHER'S MEAN AGE AT THE BIRTH OF THE FIRST CHILD

1961	25.7
1971	25.1
1981	25.2
1991	27.1
1996	28.2
2001	28.7
2010*	30.8

* provisional data

key points

Marriages: data refer to marriages celebrated in Italy during the year independently from the couple's residence. They include marriages between two who are both not-resident in Italy or between one resident and one non resident in Italy.

Marriages between Italians celebrated abroad are not included. The data include also residents living in Italy but with a foreign nationality, in reference to marriages with at least one foreign spouse, that is, where one or both spouses is a non-national

Household: a group of people tied together by marriage, kinship, affinity, adoption, guardianship or affection, sharing one home. A family may also be of one member

MAIN HOUSEHOLD TYPES IN 2003

Catania - Sigonella	24.1	39.8	11.2	-2.6	490.7
Cagliari - Elmas	22.7	37.6	12.6	-1.2	485.0

* provisional data; minimum threshold used for elaborating the data equal to 70%

Altitude:

- **Mountain**: with a height of at least 600 metres in the Northern regions and at least 700 metres in the Central and Southern regions;
- **Hill**: doesn't exceed the height of 600 metres in the Northern regions, 700 metres in the Central and Southern regions;
- **Plain**: level and flat land

Protected area: territory under protection and management régime including geographical, geological, geomorphological or biological formations of relevant naturalistic and environmental value

BATHING AND NON-BATHING WATERS IN 2004

% volume

key points

Municipal waste:

- household waste, including bulky ones
- non-hazardous waste similar to municipal waste in type and quantity
- waste from street cleaning
- greens waste from parks and gardens
- waste from cemeterial activities

Separate waste collection:

waste is assembled into homogeneous portions of different materials

AVERAGE MONTHLY EXPENDITURE BY GEOGRAPHICAL AREA

Euro, 2004

Average monthly expenditure:

is the family's average expense for consumption. It is calculated by dividing the total expenditure by the number of households

Effective average expenditure for purchase of goods:

is calculated by dividing the households' total expenditure for a good (or service) by the number of households that have purchased the good (or service)

Reference person:

the family chief as recorded in the Register Office

2001/02	72.8
2002/03	77.7

Per 100 upper secondary school leavers in the year before

The reform of the university system:

as stated in Law no 127/97 and Law no 4/99, academic courses are organised in two cycles according to the so called "3+2" formula. The first three-year cycle leads to a 1st level degree-new programme-short course; the second one, lasting two years, enables students to achieve a 1st level degree-new programme-long course. The "unique" formula programme course (5 or 6 years), equivalent to the old long-programme course, is still in force for architecture, civil engineering, pharmacy, dentistry, veterinary science and medicine

key points

NATIONAL HEALTH SERVICE HOSPITALS IN 2002

National Health Service (NHS):

includes public hospitals (with the exception of psychiatric centres) and credited private clinics (with the exception of private rehabilitation centres as laid down in Article 26 of Law no 833/78)

Hospitalisation rate:

ratio of number of in-patients to resident population (yearly average), per 1,000

Average length of stay in hospital:

ratio of number of days of stay to number of in-patients

SMOKERS BY NUMBER OF DAILY CIGARETTES SMOKED IN 2003

Legal induced abortions:

there has been a sharp reduction since Law no 194/78 made induced abortions legal in Italy. 1982 and 1983 have been the peak years, with a number of interventions exceeding 230,000 per year and an abortion rate of 16.7 and 16.4 respectively per 1,000 resident women aged 15 to 49. From that moment on, the number of induced abortions and the abortion rate progressively reduced

Body Mass Index (BMI):

is determined by dividing the body weight in kilograms by the squared height in meters. A BMI under 18.5 is considered underweight, one between 18.5-24.99 is considered a healthy weight, one between 25-29.99 is overweight and one of 30 or more is obese

SMOKERS AND NON-SMOKERS BY SEX

Per 100* people aged 14 and over, 1983-2003

CONTRIBUTION FROM TERRITORIAL DIVISIONS TO ECONOMY

% volume, 2003

Gross Domestic Product (GDP) at market prices:

final result of the productive activities of all resident units.

It corresponds to the total production of goods and services, evaluated at basic prices, less intermediate consumptions, plus vat and indirect taxes on products and imports net of contributions

Value added: difference between total production and intermediate consumptions used in the productive process. The value added at market prices is obtained by subtracting goods and service consumptions from the production evaluated at basic prices and adding the indirect taxes on the products (vat excluded) net of contributions

Full-time equivalent unit (FEU):

these are calculated by converting into full-time units all work positions each person performed during the reference period

key points

General Government:

includes institutional bodies involved mainly in the production of non-market services to the community and in the distribution of public income and wealth. Compulsory payments made by bodies belonging to other sectors are the GG's main resources

Primary balance:

net borrowing minus debtor interests paid

Net borrowing (or deficit):

income statement balance showing the total expenditure and receipts of the General Government - the sum of current balance plus capital account balance

Public debt: the amount of General Government liabilities (EU definition). The calculations shown are made to the methodological criteria provided by European Council Regulation no 3605/93

key points

Output prices index:

refers to prices applied by industrial enterprises, excluding construction companies. When passing to the base 2000=100 the basket of surveyed goods was updated (to 1,102 items), the sample of surveyed industrial companies revised (now 3,667) and the weighting structure updated

Consumer prices index:

measures the changes in the price of a basket of goods and services in time. Istat adopts three consumer price indices:

- total Italian community consumer price index (NIC), which covers the consumption of the entire present population

- index of households of wage and salary earners (CPI), which covers the consumption of households having as a reference person an employee in any non-agricultural sector

- harmonised consumer prices index (HICP). This index refers to the general community of households present but the survey is restricted to the consumption of goods and services with comparable prices in the various EU countries

Foreign trade:

foreign trade statistics are obtained from two surveys that covered Italian trade with EU countries and with other countries respectively. The survey on trade with EU countries, defined according to the Intrastat system (introduced in January 1993) is implemented on a monthly basis. Reports are submitted directly to the customs offices concerned by territory. The survey on trade with non-EU countries takes into account customs entries (single administrative document), on a monthly basis

Labour force survey:

sample survey of the main labour market aggregates. 175,000 people are interviewed from about 1,200 municipalities in all Italian provinces. The reference population is composed of all household members present and resident in Italy and enrolled in municipal local Registry offices. People permanently living in communities, hospices, orphanages, religious institutes, barracks and similar are therefore not included in the survey

Employed: all individuals aged 15 and over which in the reference week:

- have carried out at least 1 hour of paid work
 - have carried out at least 1 hour of not paid work within a relative firm for which they usually work
 - are absent from work (e.i. for holidays or illness).
- Employees which are absent from work are considered employed if the absence doesn't exceed 3 months or if during their absence they receive at least 50% of wage

Job-seekers: call individuals aged 15-74 that:

- have carried out at least 1 active action of job search during the 30 days before the survey and are available to work within the 2 weeks after the interview
- will begin to work within 3 months and are available to work within 2 weeks after the interview

Farms survey:

as stated in Council Regulation (EC) no 143/02, in 2003 Istat made a sample survey on number and structure of farms in Italy. To compare data in European Union countries, the survey's observation field refer to the EU universe, made up of all the farms with at least one hectare of used surface or with a production value over euro 2,500.

To allow comparisons, even for the Census 2000 data referred to the EU universe
